DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions, filed on 3/23/04 and 4/16/04, has been entered.

VAGUENESS AND INDEFINITENESS

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 depends from canceled claim 6 and thus is vague and indefinite as to what limitations are therein. Clarification via clearer claim wording is requested.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an

Art Unit: 1631

application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4, 7, and 8 are rejected under 35 U.S.C. 102(b) and (e)(2) as being clearly anticipated by Tawashi (P/N 5,648,101).

Tawashi discloses nitric oxide (NO) delivery as the subject matter therein as summarized in the title and abstract. Columns 1-2 of the reference summarize a number of NO effects and indicate that NO delivery is via "nitric oxide donor prodrugs as set forth in column 2, lines 29-32. The object of the invention of Tawashi is set forth in column 2, lines 55-67, as being for the delivery of NO to desired situs in a body, "especially humans". The section entitled "DETAILED DESCRIPTION OF THE INVENTION" in columns 3-7 sets forth a number of NO delivery systems and methods which also recognize that NO has a short half life and thus is transient in its effects and must therefore be delivered to specific sites or organs. See column 3, lines 42-53, as also instantly claimed, which sets forth its transient effect and specific in-situ delivery description in the reference. In column 4, lines 58-65, the reference discloses it usage specifically for blood brain barrier permeability increase as instantly claimed. This column 4 citation also discloses the neurally active compound delivery therewith as also claimed in instant claims 7 and 8. Thus, the reference clearly anticipates the above listed instant claims.

CLAIM OBJECTIONS

Claims 9-12, 14, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1631

No claim is allowed.
